2.0 Troubleshooting

If you already have an Office 365 account and are using the same browser to login, then you may experience issues connecting to the Billing Portal.

To resolve this follow one of the below steps:

- Open a Private Session in your web browser and sign in to the Billing Portal as per the above steps.
Using Internet Explorer - to launch InPrivate Browsing, click on Settings > Safety > InPrivate Browsing. You can also use the keyboard shortcut Ctrl+Shift+P to launch it.
Using Edge - click or tap the "Settings and more" button in the top-right corner. In the menu that is shown, choose "New InPrivate window." You can also use the keyboard shortcut Ctrl+Shift+P to launch it.
In Chrome - click the wrench icon in the top right corner of the screen and click New Incognito Window and start browsing. You can also use the keyboard shortcut Ctrl+ Shift + N to launch it.

OR

- Click the "Cancel" link immediately after selecting 'Sign In' button. This will stop you from signing in to your work or personal 365. Then follow the instructions above to login to the Billing Portal.
